SUMMARY

Full-stack developer based in İzmir, Türkiye. I've been writing code for about **10 years**. Started on ASP.NET and C#, moved into the React and Next.js ecosystem around 2021, and have mostly stayed there since. I ship client work end-to-end and keep a handful of my own products running in production because I get bored otherwise.

EXPERIENCE

Freelance Full-Stack & Mobile Developer (İzmir, Türkiye / Remote)

December 2019 – Present

- Design, build, and ship full-stack web and cross-platform mobile applications for clients end-to-end using Next.js, React Native (Expo), and TypeScript.
- Build and maintain several of my own SaaS products in production, including a mobile investment tracker and web tools for product launching, file compression, and investing.
- Implement backends with Node.js and NestJS (tRPC, GraphQL, Prisma), covering authentication (Better Auth), payments (Stripe), PostgreSQL, and CI/CD on Vercel and AWS.

Senior Full-Stack Developer at IWT Digital Media Agency (İzmir, Türkiye)

June 2014 – December 2019

- Developed and maintained client web applications and corporate sites across the full stack using ASP.NET and C#.
- Delivered agency projects from database to UI, collaborating with designers and clients on requirements, implementation, and delivery.

SKILLS

Frontend: React, Next.js, React Native, TypeScript, Tailwind CSS, shadcn/ui

Backend: Node.js, NestJS, tRPC, GraphQL, Prisma, Better Auth, Stripe, Go, C#/.NET
